GOAL #1. Chemical Name: Aniline	CASRN: _63-53-3
Narrative description of proposed project:	
We are implementing a two-phase project involving several process	s changes that will reduce waste generation in the Aniline complex.
In the first phase, we will recycle a stream currently burned in the	
the amount of a different wastestream currently generated and burn	
How we will measure success:	
We will determine the amount of aniline waste generated in the p	rocess unit after implementation of all projects.
1a. Our voluntary <b>source reduction</b> goal for Chemical #1 is to redu amount of 1,960,000 pounds in December, 2004 (month/year).	
1b. To accomplish this goal, we will use the following source reduct	tion options (check all that apply):
X Equipment or technology modifications. X	Process or procedure modifications.
Reformulation or redesign of products.	Substitution of less toxic raw materials.
Improvements in inventory control.	Improvements in maintenance/housekeeping practices.

	in the Aniline 2 Boiler (BIF) unit. In the second phase, we will reduce
the amount of a different wastestream currently generated an	d burned in the boiler.
How we will measure success:	
We will determine the amount of benzene waste generated in	the process unit after implementation of all projects.
1a. Our voluntary <b>source reduction</b> goal for Chemical # i	s to reduce the amount of this chemical generated/used from a baseline
amount of pounds in (month/year) to	a reduced amount ofpounds generated/used by
(month/year).
